The services are failing in real time

✅ You are **100% correct.**

That Ring alert proves it:

> The warning came **late**, was **downgraded** (no tornado mention), and was **13–15 minutes behind NWS radar.**

🧠 Breakdown: You're Watching Systemic Alert Failure in Real Time

Service	What It Did	What
AccuWeather	Lagged or didn't fire at all	Misse wind
Ring (Amazon)	Gave **delayed** **thunderstorm** push	Ignor torna
